PROFESSIONAL SUMMARY

Final-year BEng Software Engineering student at the University of Westminster, currently interning at VOLINOR Defence and Technology Inc. in a backend role. Experience building and deploying full-stack web applications, backend systems and self-hosted projects. Final year project will use both Java and Python.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL

Tools & Platforms: Docker, Git/GitHub, Linux (Ubuntu/WSL2), Cloudflare Tunnel

Technologies: REST APIs, OAuth, authentication, backend and full-stack development

PROFESSIONAL EXPERIENCE

Full-Stack & Backend Developer Intern | VOLINOR Defence and Technology Inc., Turkey | *Jun 2026 - Present*

- Started on-site as a full-stack intern, then moved into a backend-focused role in July and continued remotely through December.
- Built the backend of the company website (volinor.com) using Django and wrote around 90% of the backend code.
- Structured the code with separate model, view and service classes, keeping logic such as admin approval checks encapsulated in their own classes rather than in the views.
- Added Google OAuth login and email verification, with an admin-approved whitelist step before new users are given access.
- Built the admin panel, including product management and a pending-member queue, with an automatic email to the admin for each new sign-up.

Software Development Specialist | VOLINOR Defence and Technology Inc., Turkey | *May 2024 - Sep 2024*

- Wrote technical documentation for 5+ software projects and coordinated workflow tools for a 10-person team.
- Supported requirements analysis and testing, and set up reporting templates that made cross-team updates easier.

Customer Assistant | Waitrose & Partners, London | *Mar 2025 - Jun 2025*

- Handled till operations and day-to-day customer service in a busy retail environment.

Volunteer Sales Assistant | LÖSEV, Turkey | *Jun 2022 - Jul 2022*

- Supported charity sales and fundraising, contributing to over £2,000 in donations.

SELECTED PROJECTS

berktan.dev - Personal Portfolio & Home Server | Docker, Ubuntu, Cloudflare Tunnel

- Self-hosted portfolio site running on a home laptop, hosting live demos of personal projects.

github.com/AkoSuminoe/berktan-dev

Whisper Subtitle Generator | Python, OpenAI Whisper

- Tool that generates subtitles from audio and video, deployed as a live demo on berktan.dev.

github.com/AkoSuminoe/whisper-subtitle-generator

CS2 AWP Lego Server Creator | C#, CounterStrikeSharp

- Setup tool for a dedicated Counter-Strike 2 server with automated configuration and 86% test coverage.

github.com/AkoSuminoe/Cs2_AwpLego_Server_Creator

aim_trace - Shooting Practice App (team project) | Flutter/Dart, BLE, IMU

- Flutter app that pairs with a wearable IMU sensor band to track hand and gun movement; built the Bluetooth (BLE) connection and data pipeline as one of two developers.

EDUCATION

BEng Software Engineering | University of Westminster | 2024 - 2027

Final Year Project (2026-2027): Building a software solution using Java and Python, applying system design, testing, version control and deployment.

Relevant modules: Object-Oriented Programming, Database Systems, Machine Learning and Data Mining, Algorithms.

Achievements: Selected for the WWC Tokyo Programme; WBL Live Project (CSE) Certificate, Aug 2026.

INTERESTS

Guitar, live music, basketball, karting, fitness and technology projects.
